

Since 2001, we've helped dozens of Michigan start-up companies establish and enhance their IT infrastructure. We've worked with some of our clients as they have grown from 2 people to 200. We know the special office technology challenges that start-ups face. We understand where you're starting from, and where you are going.

We aren't a reseller or agent for any vendor, so we are free to give you our independent opinions of their products and services.

We don't believe in "one size fits all" or "one tool for all problems". Our flexibility allows us to customize IT systems for your unique circumstances.

Call us today at 248-714-5369 to speak about the latest in information technology for your business start-up.
